Subject: Your letter of
Re: Arkansas Continued Care Hospital (ACCH)

It is possible that my earlier communication contained too much information. I sent the same package to the governor and attorney general so that each could determine what parts of it fell under their purview. I have separated the information relevant to law enforcement and have included it here. There seems to be a need for a criminal investigation and the attorney general is the recommended authority in such a case.

The fact that the hospital is no longer in business may make investigation more difficult but I can identify the operators and employees and the management company in Texas. That company managed a number of hospitals with deplorable reputations similar to that of ACCH and some are strangely enough now out of business as well. I can personally testify to the behavior that seems to have caused a large number of unnecessary patient deaths and have the hospital records to prove what happened in my case. I escaped with my life because my family intervened and removed me but remain disabled and with a diminished life expectancy. It seems that many patients were not so fortunate.

In my condition I literally as in the literal meaning of literally may not be alive long enough to receive you reply - it took a couple of months last time. I had to ask a friend in the state legislature to inquire as to whether the governor had seen my letter before I got a reply. I hope this clarifies my concerns as if nothing else a dangerous doctor is still out there plying his trade as the state medical board - with this information and much more - refused to take action.

Respectfully,

Stanley K. Lawrence
